ASCE 2025 CONVENTION

SEATTLE | OCT. 8-11

The American Society of Civil Engineers represents more than 150,000 members of the civil engineering profession in 177 countries. Founded in 1852, ASCE is the nation’s oldest engineering society. ASCE stands at the forefront of a profession that plans, designs, constructs, and operates society’s economic and social engine—the built environment—while protecting and restoring the natural environment.

CONVENTION PURPOSE

The ASCE Convention is the Society’s flagship membership event. It is the single event that draws together the entire Society and reflects the diversity that ASCE encompasses. The Convention presents integrated, cross-cultural, technical, and educational programming.

The program topics define a critical body of knowledge that draws attendees back year after year, providing benefits to attendees and their employers on an educational and professional level. The target audience includes leaders in the civil engineering profession across all disciplines and levels of experience—from students and younger professionals to seasoned experts.

CONVENTION TOPICS

Technical sessions will present a well-rounded mix of subjects from each of these topic categories to appeal to a broad, diverse group of practicing engineers, academicians, and affiliated professionals.

- State of the Industry/Profession
- Strategic Issues/Public Policy
- Significant Projects
- History & Heritage
- Integrated Systems
- Systems Failures
- Industry Leaders Forum
